PROJECTS

EDUK8U Platform Tools Suite

Jun 2026

EDUK8U | Tech: React, Next.js, TypeScript, Supabase, Vercel, Google Apps Script

- Built an AI-assisted resource generator producing compliance-ready VET training and assessment packages across 31 units for two qualifications, replacing a multi-day manual drafting process with a single AI-assisted run
- Designed a custom project management platform replacing paid SaaS tools like Jira and ClickUp at zero ongoing cost, including a self-built AES-256 encrypted credentials vault with isolated access policies

SE Platform Insights Automation Suite

Apr 2026

Mela Automations | Tech: Azure OpenAI, Electron, Node.js, Edge CDP, Teams Webhooks

- Built a unified AI-powered desktop suite that automates DevOps and Azure Data Factory workflows from a single conversational interface
- Implemented function-calling orchestration for natural language, multi-step execution with preview and confirmation
- Added integrated run history, model selector, tool cards, and live run stats to improve usability

Param Collector + Reingestion + Alerts Monitor + Failure Dashboard

Mar 2026

Mela Automations | Tech: Edge CDP, ADF, Node.js Worker Threads, Teams, Chart.js, Azure OpenAI

- Automated ADF parameter extraction across 14+ pipeline types and enabled secure session-based scraping without stored credentials
- Built a bulk reingestion engine with retry logic, live telemetry, and Teams run-summary notifications; added failure analytics with AI-generated recommendations

TagSight - Visual Tag-Based People Accounting System for Emergency Evacuation

Nov 2025

Accenture | Tech: Computer Vision, Raspberry Pi, Gen AI

- Developed a non-contact visual tag-based system using ArUco markers and computer vision for emergency scenarios
- Built camera and Raspberry Pi pipeline connected to a real-time dashboard; won Champion at the FY26 Sustainability Hackathon

PROFESSIONAL EXPERIENCE

Systems, Web & AI Enablement Consultant (Tech Team Lead) - EDUK8U

May 2026 - Present

Freelance

- Acts as Tech Team Lead and project manager for the tech department, supervising fellow developers and interns and coordinating deliverables across EDUK8U, Workready Asia, ICQA, and Attend Care
- Leads AI automation and workflow optimization, designing and implementing AI agents and tools to eliminate manual processes
- Reports directly to the CEO and Director on AI roadmap initiatives, including AI-powered learning simulators and case study platforms

Mid Level Software Engineer (Packaged App Dev Analyst) - Accenture

Jun 2024 - Present

- Drives full-stack delivery in an agile team building Azure-focused software enhancements and platform capabilities
- Designed and deployed leadership-facing Power BI dashboards used by stakeholders across multiple countries
- Engineered automation tooling that removed repetitive workload and increased operational speed by 92 percent
- Recognized as Subject Matter Expert for mentoring and onboarding across the product workstream

Assistant Engineer - Yokogawa Philippines, Inc.

Nov 2023 - Apr 2024

- Supported distributed control systems and industrial automation software in client-facing environments
- Delivered after-sales support through on-site dispatch, issue resolution, and technical troubleshooting
- Managed Factory Acceptance Test and configuration documentation for compliance and audit readiness

EDUCATION

Bachelor of Science in Computer Science

Jun 2019 - Aug 2023

Pangasinan State University - Main Campus

- Academic Distinction | GPA: 1.49 | DOST Scholar

ADDITIONAL INFORMATION

- Languages:** English, Filipino.
- Certifications:** Power BI Data Analyst Associate (**PL-300**), AI Fundamentals (**AI-900**), Azure Fundamentals (**AZ-900**), Azure Data Fundamentals (**DP-900**), Fortinet NSE 2 & NSE 3.
- Awards:** FY26 **Sustainability Hackathon - Champion** (Accenture), Best Student Research (2023), DICT Start-Up Challenge PH Runner-Up (2023), Best in Thesis (2023).
