MELAMAR FAUSTINO

SOFTWARE ENGINEER | DATA & AI SPECIALIST | POWER BI DEVELOPER

Fairview, Quezon City, Philippines | 0930 593 8658 | melamarfaustino@gmail.com | www.linkedin.com/in/melamar-faustino-078b1b180

Dynamic Software Engineer and Data & AI Specialist with a passion for building intelligent automation platforms and data-driven solutions. Recognized for architecting end-to-end systems that transform business operations, accelerate decision-making, and deliver measurable impact. Expert in Azure Data Services, Power BI, and AI-powered automation, with a proven ability to lead innovation from concept to deployment.

SKILLS & EXPERTISE

Generative AI	AI Agents	Prompt Engineering
Azure OpenAI	Power BI	DAX
Power Query	Data Modeling	Data Analytics & Visualization
SQL	ETL/ELT (Azure Data Factory)	PySpark
Azure Data Factory	Azure Databricks	Microsoft Fabric
Azure AI Search	Python	Node.js
React	Next.js	Supabase
Git/GitHub	CI/CD & DevOps	Agile/Scrum Methodologies

PROFESSIONAL EXPERIENCE

Mid Level Software Engineer - Accenture **June 2024 - Present**

- Drives full-stack development on an Azure-powered agile team, consistently shipping solutions that make a real difference for enterprise clients across multiple regions
- Builds and manages end-to-end ETL/ELT pipelines in Azure Data Factory, developing new pipelines and enhancing existing ones to keep enterprise data reliable, current, and analytics-ready
- Designs Power BI dashboards from scratch and maintains them long-term, owning the semantic model, DAX measures, and Power Query transformations; Microsoft Certified Power BI Data Analyst Associate (PL-300), with dashboards now used by international leadership to steer key business decisions
- Identified inefficiencies others overlooked and built automation workflows that cut manual workload by 92%, giving the team back time that actually matters
- Earned SME recognition not just for technical depth, but for a collaborative approach that keeps teammates unblocked, upskilled, and moving forward

Systems, Web & AI Enablement Consultant - EDUK8U **May 2026 - Present**

- Acts as Tech Team Lead and project manager for the tech department, supervising fellow developers and interns, coordinating deliverables, and ensuring projects move forward on track
- Supporting EDUK8U's digital transformation across its group of platforms including EDUK8U, Workready Asia, ICQA, and Attend Care
- Leading AI automation and workflow optimization, designing and implementing AI agents and tools to eliminate manual processes and improve operational efficiency
- Enhancing and maintaining the organization's Moodle LMS to improve the student and faculty digital experience
- Reporting and collaborating directly with the CEO and the Director on AI roadmap initiatives, including AI-powered learning simulators and case study platforms

Assistant Engineer - Yokogawa Philippines, Inc. **November 2023 - April 2024**

- Gained hands-on expertise in Distributed Control Systems (DCS) and industrial automation, bridging engineering principles with real-world operational demands
- Delivered reliable after-sales support and on-site troubleshooting for systems where downtime isn't an option
- Brought order to complex compliance workflows, ensuring Factory Acceptance Tests and system documentation met strict industry standards
- Owned installations end-to-end, from initial hardware setup through configuration, testing, and handover, with minimal oversight

PROJECTS

EDUK8U Platform Tools Suite **Jun 2026**

EDUK8U | Tech: React, Vite, Express, Node.js, Anthropic/Azure OpenAI APIs, docx/pptx generation

- Full-stack app: React/Vite frontend, Express backend proxying to a swappable LLM provider (Azure OpenAI or Anthropic Claude), keeping API keys server-side only
- Deterministic compliance engine: maps every performance criterion, performance evidence, and knowledge evidence item to generated content, then runs an automated gap check independent of the AI's own claims
- Google Workspace SSO — access restricted to the organization's domain, enforced at the middleware and auth-callback level

SE Platform Insights Automation Suite **Apr 2026**

Mela Automations | Tech: Azure OpenAI (gpt-4o-mini), Electron, Node.js, CDP, Teams Webhooks, Edge CDP

- Agentic AI chat assistant that autonomously invokes the right tools in sequence based on natural language
- Function-calling with Azure OpenAI: preview and confirm before execution
- Supports 14+ ADF pipeline types with overlay UI and bulk/selective collection

AutoRent Data Pipeline **Aug 2024**

Avanade | Tech: Azure Data Factory, Azure Databricks, PySpark, Delta Lake

- Bronze-silver-gold medallion lakehouse with a star-schema gold layer serving Power BI
- Python/PySpark transformations on Databricks; SCD Type 2 historization for customer and rental records
- Parameterized ADF pipelines with automated orchestration and error handling

TagSight **Nov 2025**

Accenture | Tech: Computer Vision, Raspberry Pi, Gen AI, Hardware

- Camera + Raspberry Pi device with real-time dashboard and Gen AI integration
- Champion: FY26 Accenture Sustainability Hackathon

EDUCATION

Bachelor of Science in Computer Science **June 2019 – Aug 2023**

Pangasinan State University – Main Campus

- GPA: 1.49 | Academic Distinction | DOST Scholar

ADDITIONAL INFORMATION

Languages: English, Filipino.

Certifications: Claude Certified Associate - Foundations (CCA-F), GitHub Foundations (GH-900), Power BI Data Analyst Associate (PL-300), Azure AI Fundamentals (AI-900), Azure Data Fundamentals (DP-900), Azure Fundamentals (AZ-900), Fortinet Certified Associate in Cybersecurity (FCA), Fortinet Certified Fundamentals in Cybersecurity (FCF).

Awards: Adhikalinisan Sustainability Pitching Competition – Champion, Best Student Research (2023), DICT Start-Up Challenge PH (2023) – Runner-Up, Best in Thesis (2023).
